

Vocabulary Crossword

This lesson is designed to help students learn their vocabulary words. Students should be provided a vocabulary list a day prior to this lesson. After receiving the vocabulary words their assignment is to define and write a sentence for each word. They should come to class prepared with this assignment completed. Now that they have defined the words, the crossword puzzle acts as a review for the students. I designed the puzzle to be completed in groups in about 10-15 minutes. Each group will complete the puzzle and the first group that finishes will receive some type of reward, the reward is up to the teacher's digression. These particular words come from the book The Westing Game and should fit along with the unit.
