

Graphic Organizer

This assignment is designed to help students categorize the character within the book The Westing Game. They will mark what they believe to be the character traits of each heir within the game according to their own opinion. This will help students sort out who is who and how they act. They will also be able to compare their decisions with those of their other classmates to see how they view the characters differently. This activity could be used at the beginning of the book as well as the end. It might even be a good idea to use the activity twice to see if their opinions of the characters change.
